

# MINIJET

The MINIJET P400 is designed for blowing or floating telecommunication cables (optical fiber, coaxial or multipair) in preinstalled ducts

## ADVANTAGES :

- ☑ easy installation and quick release of the cable, no tools required
- ☑ no maintenance
- ☑ quick change of the belt
- ☑ no vertical adjustment of the driving device (concentric belt drive) as the cable follows the same axis

Type	Pushing force (N)	Max. speed (m/min.)	Recomm. speed (m/min)	Diameter of cable (mm)	Outer diameter of duct (mm)	Max. pressure (bar)	Dimension L x w x h (mm)	Weight (kg)
MINIJET	0-300	100	60	4-16	8-40	16	520x375x380	20

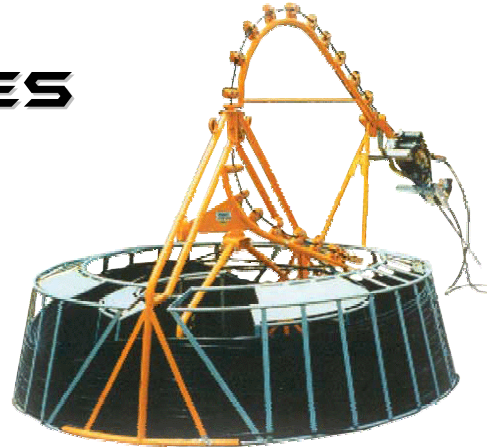

## CHARACTERISTICS :

- possibility to lay sections of up to 3000 meters distance
- pneumatic pressure gauge
- mono-directional
- blowing of bundle of microducts possible (please consult us)
